NAME

mkdir — make a directory

SYNOPSIS

mkdir dirname ...

DESCRIPTION

Mkdir creates specified directories in mode 777, possibly modified by the current *umask*(1). Standard entries, '.', for the directory itself, and '..', for its parent, are made automatically.

Mkdir requires write permission in the parent directory.

SEE ALSO

rm(1), umask(1)

DIAGNOSTICS

Mkdir returns exit code 0 if all directories were successfully made. Otherwise it prints a diagnostic and returns nonzero.
