NAME

musixflx – process mx1 files (the second pass of 3-pass MusiXTeX typesetting)

SYNOPSIS

[texlua] **musixflx[.lua]** *jobname* [.mx1 | .tex] [*debugmode*]

where *debugmode* can be

d	output debugging information to the screen
m	output line numbers to the screen
f	output debugging information to jobname.mxl (not mx1)
s	output computed lines to the screen

To allow for ease of use with a batch file, **musixflx.lua** can be fed with either *jobname.mx1*, *jobname.tex*, or just *jobname*, any of which open *jobname.mx1* and create *jobname.mx2*.
