

CS799 Ridiculously Advanced Systems

Term Report

Peter A. Wiseguy

1st December, 2018

Abstract

This document is a simple template for a typical term or semester paper (lab/course report, “Übungsbericht”, etc.) based on the HagenbergThesis LaTeX package.¹ The structure and chapter titles have been formulated to provide a good starting point for a typical *project report*. This document uses the custom class `hgbreport` which is based on LaTeX’s standard `report` document class with `chapter` as the top structuring element. If you wish to write this report in German you should substitute the line

```
\documentclass[english]{hgbreport}
```

at the top of this document by

```
\documentclass[german]{hgbreport}.
```

To omit the default **title page** (as in this document) use the `notitlepage` option, e.g.,

```
\documentclass[notitlepage,english]{hgbreport}.
```

Also, you may want to place the text of the individual chapters in separate files and include them using `\include{.}`.

Use the abstract to provide a short summary of the contents in the document.

¹See <https://github.com/Digital-Media/HagenbergThesis> for the most current version and additional examples. This repository also provides a good introduction and useful hints for authoring academic texts with LaTeX.

Contents

1 Aims and Context	3
2 Project Details	4
3 System Documentation	5
4 Summary	6
A Supplementary Materials	7
References	8

Chapter 1

Aims and Context

Describe the initial goals and situation that lead to this project, requirements, as well as references to related work (e.g., [1]).

Chapter 2

Project Details

Describe important project steps, e.g., the rationale of the chosen architecture or technology stack, design decisions, algorithms used, interesting challenges faced on the way, lessons learned etc.

Chapter 3

System Documentation

Give a well-structured description of the architecture and the technical design of your implementation, with sufficient granularity to enable an external person to continue working on the project.

Chapter 4

Summary

Give a concise (and honest) summary of what has been accomplished and what not. Point out issues that may warrant further investigation.

Appendix A

Supplementary Materials

The appendix is a good place to attach a user guide, screenshots, installation instructions etc. Add a separate chapter for each major item.
