

NAME

`dvi2fax` – convert a TeX DVI file to G3 fax format

SYNOPSIS

dvi2fax [-hi|-lo] file[.dvi] [*options for dvips*]

DESCRIPTION

dvi2fax uses **dvips**(1) to convert a TeX DVI file to PostScript, then **gs**(1) to convert the PostScript to G3 fax file format.

OPTIONS

-hi use high fax resolution (204x196 dpi) (default).

-lo use low fax resolution (204x98).

dvips options can follow the file name.

EXAMPLE

Example: `dvi2fax foo -l 2`

SEE ALSO

dvips(1), **gs**(1).
