

NAME

pdfbook – put the pages of PDF files into 2-up signatures

SYNOPSIS

pdfbook [--short-edge] [OPTION [OPTION] ...] [SRC [PAGESPEC] [SRC [PAGESPEC]] ...]

DESCRIPTION

pdfbook makes 2-up versions of PDF files, with the pages ordered as signatures. The default signature size is 4: to change this, use the option '`--signature N`', where N is a multiple of 4 (alternatively use '`--signature* N`' for right-edge binding).

The default is to make pages suitable for long-edge binding. For short-edge binding, use '`--short-edge`' as the first argument; this will only work if the LaTeX package 'everyshi' is installed.

The default output page orientation is landscape. To change this, use the '`--no-landscape`' option.

By default, the option '`--booklet true`' is used (see the pdfpages manual for details). To turn this off, just specify '`--booklet false`'.

If no source PDF file ('SRC') is specified, input is from /dev/stdin. If 'PAGESPEC' is omitted, all pages are processed.

Source files are processed sequentially into a single output unless the '`--batch`' option is used, in which case they are processed separately.

pdfbook is a simple wrapper for pdfjam, which provides a front end to many of the capabilities of the pdfpages package for pdflatex. A working installation of pdflatex, with the pdfpages package, is required.

pdfbook operates on one or more PDF files, and (either with the '`--batch`' option or with '`--outfile DIR`' where 'DIR' is a directory) the resulting files have the suffix '-book' applied to their names by default. To change the suffix, use the '`--suffix`' option, for example

```
pdfbook --suffix 'sig4' --batch myfile1.pdf myfile2.pdf
```

will result in files named 'myfile1-sig4.pdf' and 'myfile2-sig4.pdf'.

pdfbook is part of the "PDFjam" package of tools, whose homepage is at <http://www.warwick.ac.uk/go/pdfjam>.

SETUP

See <http://go.warwick.ac.uk/pdfjam> .

USAGE

For the other available options and site/user defaults, see the output of

```
pdfjam --help
```

For further information and some examples see <http://go.warwick.ac.uk/pdfjam> .

LIMITATIONS AND BUGS

pdfbook does not work with encrypted PDF files, and does not preserve hyperlinks.

Please report bugs! See the website at <http://www.warwick.ac.uk/go/pdfjam> .

LICENSE

PDFjam is distributed under the GNU public license.

SEE ALSO

pdfjam(1).

AUTHOR

pdfbook is written and maintained by David Firth as part of the PDFjam package.
